Transmitters

We established the company in September, 1999 in Uppsala, the fourth largest city in Sweden. We started with a vision, an IR-Vision and we raised the money to get our vision on the way. Our goal is set step by step and is focused on the main target, which is to get the product patented and fully functional in all ways we have thought of.

Transmitters

Our goal is to make our first product so good that it will be just as common as the cellular phone. And with that modest expectation we are pretty sure that we will succeed to conquer our goal.
